

FACT

K-12 SCHOOL SAFETY SOLUTIONS

When Every Second Counts, Pre-Event Notification Saves Lives. *Intelligent early warning, real-time threat communication, and coordinated crisis response — purpose-built to protect students, staff, and communities before danger arrives.*

► THE THREATS SCHOOLS FACE TODAY

 WEATHER EMERGENCIES Tornadoes, severe storms, and flash floods strike without warning. Schools need immediate, multi-channel alerts that trigger shelter-in-place and evacuation protocols before conditions become life-threatening.	 ACTIVE SHOOTER EVENTS The window between threat identification and violent escalation is measured in seconds. Delayed notification costs lives. FACT delivers pre-event intelligence and instant campus-wide lockdown alerts the moment a threat is detected.	 VIOLENCE & CAMPUS THREATS Physical altercations, weapons on campus, and credible threats require coordinated, immediate communication to law enforcement, administrators, and parents — simultaneously and without delay.	 SUICIDE PREVENTION Early behavioral signals and at-risk indicators require discreet, rapid communication to counselors and support teams. FACT's notification framework ensures the right people are alerted at the earliest possible moment.
Pre-Event Early Warning Intelligence	< 15 Seconds Campus-Wide Alert Delivery	100% Reach Every Stakeholder, Every Channel	

► THE FACT SCHOOL SAFETY PLATFORM

FACT's school safety platform combines real-time environmental intelligence, behavioral signal detection, and Distributed Recipient Messaging (DRM) to create a pre-event notification ecosystem that acts before a situation becomes a crisis. By applying AI-driven pattern recognition and predefined threat algorithms against key risk indicators, FACT delivers the right alert to the right person through the right channel — every time.

► PLATFORM CAPABILITIES

◆ Pre-Event Threat Detection FACT monitors environmental, behavioral, and situational signals continuously — identifying escalating risk patterns before a threat materializes. Administrators receive actionable intelligence, not just reactive alarms.	◆ Distributed Recipient Messaging (DRM) FACT's proprietary DRM simultaneously delivers targeted alerts to students, staff, law enforcement, parents, and emergency responders — through SMS, email, intercom, and app push — in under 15 seconds.
◆ Multi-Threat Protocol Management Preconfigured response protocols for weather, active shooter, violence, and mental health crises automatically activate the correct notification chain — eliminating confusion and human delay during critical moments.	◆ Suicide & Mental Health Alerting Discreet, role-based alerts route at-risk behavioral signals to counselors and mental health teams immediately, enabling early intervention before a student reaches a point of crisis.

► HOW FACT PROTECTS YOUR CAMPUS

01 DETECT AI-driven monitoring identifies environmental, behavioral, and situational threat signals the moment they emerge — across every corner of your campus.	02 NOTIFY DRM instantly delivers role-specific alerts to every stakeholder simultaneously — staff, students, parents, and first responders — through every available channel.	03 RESPOND Pre-loaded crisis protocols automatically coordinate lockdowns, evacuations, shelter-in-place, or counselor dispatch — reducing response time to seconds.

► WHY SCHOOLS CHOOSE FACT

01 PRE-EVENT ADVANTAGE FACT acts before a crisis peaks — not after. Early warning intelligence gives administrators and first responders the seconds that save lives.	02 EVERY CHANNEL, EVERY STAKEHOLDER One platform reaches every audience simultaneously — no missed alerts, no communication gaps, no parents left uninformed during an active event.	03 COMPLIANCE & ACCOUNTABILITY Full audit trails of every alert, every response, and every recipient — supporting Alyssa's Law compliance, state safety mandates, and district accountability requirements.
