

FACT

MISSION CRITICAL SOLUTIONS

The Safety Layer That Mission-Critical Operations Cannot Afford to Ignore Real-time monitoring, intelligent alerting, and distributed communications — purpose-built for environments where failure is not an option.

► THE OPERATIONAL RISK LANDSCAPE

DATA CENTERS Power fluctuations and thermal runaway cost enterprises millions per hour. Undetected anomalies cause hardware failures and SLA breaches before any alarm is raised.	HOSPITALS & HEALTHCARE Patient safety requires stable environments — temperature-controlled medication storage, reliable power for life-critical equipment, and instant staff notification.	WAREHOUSES & LOGISTICS Cold chain compliance and worker safety depend on continuous visibility. A silent sensor failure can invalidate entire product batches or trigger regulatory liability.

Intelligent Suppression Engine

► THE FACT PLATFORM

Real-Time Environmental Monitoring Continuous tracking of temperature, humidity, air quality, and power across every facility zone.	Power & Electrical Anomaly Detection Instant identification of voltage irregularities and load imbalances before they escalate.	Thermal Stability Alerts Precision thermal mapping with threshold-based alerts to prevent equipment damage.	Distributed Recipient Messaging (DRM) FACT's proprietary DRM ensures the right stakeholders receive the right alerts — every time.
False-Positive Suppression Engine Intelligent filtering eliminates noise so operators focus only on genuine threats.	Audit-Ready Compliance Trails Immutable, timestamped event logs satisfying HIPAA, SOC 2, and critical infrastructure requirements.	Multi-Site Operational Continuity Centralized visibility across distributed facilities with unified incident management.	Secure Communications Architecture End-to-end encrypted messaging with role-based access — sensitive data never exposed.

► WHY FACT

01 UNIFIED PLATFORM One integrated system replaces fragmented point solutions, eliminating blind spots created by disconnected tools.	02 SPEED AT SCALE From anomaly to stakeholder notification in under 30 seconds across thousands of simultaneous monitoring points.	03 COMPLIANCE BY DESIGN Every event is logged and audit-ready from day one — supporting HIPAA, SOC 2, and critical infrastructure frameworks.
--	---	--

Protect What Cannot Fail. Schedule a platform demonstration and see how FACT secures your mission-critical operations.
