► **THREATS FACING GOVERNMENT FACILITIES TODAY**

🔊 ACTIVE THREATS & VIOLENCE Government buildings are high-value targets for violence, armed confrontations, and workplace incidents. Rapid pre-event detection and instant lockdown notification are the difference between a contained incident and a catastrophe.	💣 BOMB THREATS & TERRORISM Municipal facilities and courthouses face credible bomb threats, suspicious package incidents, and domestic terrorism risks requiring immediate coordinated evacuation and law enforcement notification protocols.	🌪️ SEVERE WEATHER & NATURAL DISASTERS Government facilities must maintain operational continuity through tornadoes, floods, and severe weather events — with real-time alerts triggering shelter-in-place, evacuation, and public communication simultaneously.	⚡ CIVIL UNREST & CROWD EVENTS Protests, demonstrations, and civil disturbances can escalate rapidly. FACT delivers pre-event situational awareness and coordinated notifications to security teams, administrators, and law enforcement before tensions peak.

► **THE FACT GOVERNMENT SAFETY PLATFORM** FACT's municipal and government safety platform integrates real-time environmental monitoring, AI-driven threat detection, and Distributed Recipient Messaging (DRM) into a unified command layer that gives facility managers, security personnel, and emergency coordinators a decisive pre-event advantage. Predefined response protocols and key business rule algorithms ensure that every threat type — from an armed intruder to a severe weather event — triggers the precise, coordinated notification chain required to protect lives and preserve continuity of government operations.

► **PLATFORM CAPABILITIES**

⚡ Pre-Event Threat Detection FACT continuously monitors behavioral signals, environmental conditions, and access control data to identify escalating risk before it becomes an active event — giving responders precious seconds to act.	⚡ Distributed Recipient Messaging (DRM) FACT's proprietary DRM simultaneously alerts building security, facility managers, elected officials, law enforcement, and the public through SMS, email, intercom, digital signage, and push notification — in under 15 seconds.
⚡ Multi-Threat Protocol Management Preconfigured response protocols for active threats, bomb threats, weather emergencies, and civil unrest automatically activate the correct notification chain and response procedures — removing hesitation and human delay.	⚡ Continuity of Operations Support FACT ensures government services remain coordinated and accountable during any crisis — with real-time status dashboards, cross-agency communication channels, and full incident audit trails maintained throughout every event.

► **HOW FACT PROTECTS YOUR FACILITY**

01 DETECT AI-driven monitoring identifies environmental, behavioral, and physical security threat signals across every zone of your facility the moment they emerge.	02 NOTIFY DRM instantly delivers role-specific alerts to every stakeholder simultaneously — security, staff, leadership, and first responders — through every available channel.	03 COORDINATE Preloaded emergency protocols automatically activate the correct response — lockdown, evacuation, shelter-in-place, or multi-agency dispatch — reducing critical response time to seconds.
---	---	---

► **WHY GOVERNMENT FACILITIES CHOOSE FACT**

01 PRE-EVENT ADVANTAGE FACT acts before threats escalate — delivering early warning intelligence that gives administrators and first responders the critical seconds needed to protect lives.	02 UNIFIED COMMAND One platform connects building security, facility operations, elected officials, and multi-agency emergency responders — eliminating communication gaps during active events.	03 COMPLIANCE & AUDIT READY Full immutable event logs support NIMS, DHS, and state emergency management compliance requirements — with complete accountability from first alert to final resolution.
